**Date:** 6/9/2015      **Status:** Inspection      **Author:** Martin, Russell

**Updated Oil Volume:**

**Updated Salt Water Volume:**

**Updated Other Volume:**

**Updated Other Contaminant**

**Notes:**

6/9/2015 at 15:32, on location. Met with site personnel who pointed out location of incident. Mist came out of tanks at southwest corner of facility due to programming error. Visible residue on fence line to the southwest of the tanks. Some scraping appears to have been performed, as there are many erosion blankets and wattles off location in the adjacent pasture land drainage to the southwest. Standing water from recent rains shows no visible sheen, vegetation in drainage is growing, some of the scraped parts have not yet fully recovered but no visible staining on the vegetation or dirt.
